Varo: *FLM295SP7*

Performance improvements

Security improvements

Change how web dispatcher works

Dashboard improvements

Form Manager re-styling: Fiori-like

Target: 1st May

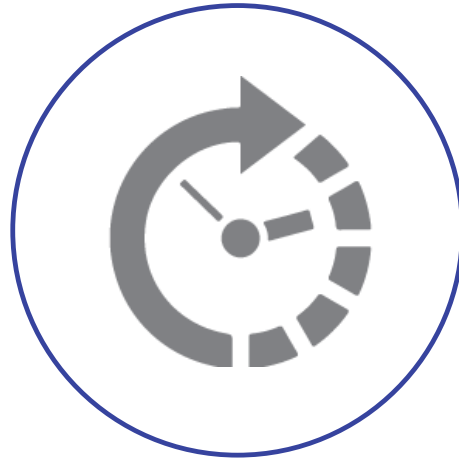

Target: 1st July

Innovations for Stelo

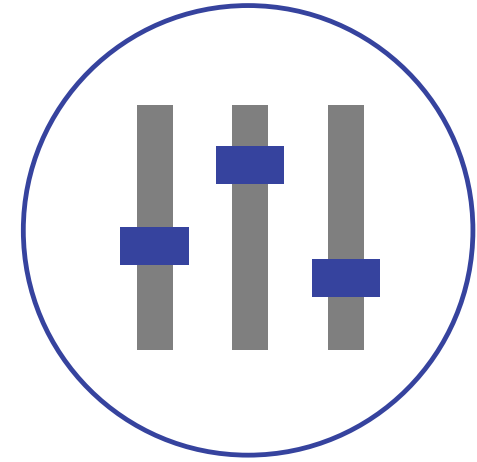

Offline Stelo apps

Stelo-generated offline versions of your apps, supporting offline access from both desktop and mobile devices.

Enhanced Stelo plugin

Extended app definition capabilities, including out-of-the-box support for the latest SAPUI5 libraries, further accelerating app development.

Stelo app cockpit

SAPUI5-based interface for defining the wider business-logic underlying the app, including workflow, pre-population, field control and more.
